from 370 to 610 mm
black

A robust stand for all common marching and concert drums. The solid steel construction with resistant powder coating folds flat for transport. Soft rubber caps and pads ensure a secure stand and protect the drum from scratches. The ergonomic clamping lever allows quick and easy set-up and folding. The solid metal joint interlocks with 5° steps thus enabling a variety of different positions. With the help of a scale, you can quickly find your preferred position.
