| **Material** | steel |
| **Quality level** | Topline |
| **Special features** | is hung on the crossbar of the »Omega«; with side openings for convenient cable routing |
| **Type** | black |
Finally, an end to the "cable tangle". The practical box made of sturdy sheet steel is simply hung on the crossbar of the »Omega« with two screws in no time. The box can be used, for example, to store a power box or extra-long cables neatly and in a space-saving manner. Side openings provide enough space for convenient cable routing. The durable powder coating protects the surface in the studio just as well as in the everyday tour.
