The amp stand can hold monitors, amps or other equipment to a max. weight of 77.162 lbs without a problem. The angled front legs have significantly improved the stand?s stability and strength. The low centre of gravity ensures even larger amps are securely displayed. The fine adjustment on the supporting leg allows a tilt between 15° and 28°. A microphone can be attached to the telescopic tube using a boom arm with a thread of either 3/8" or 5/8". Folds compactly.
